

Stacked bar chart showing the relative abundance of different life stages (eggs, larvae, pupae, adults) for four host species: *M. capitata*, *P. varians*, *P. acuta*, and *P. compressa*. The y-axis represents relative abundance from 0 to 1.0. The legend indicates: eggs (pink), larvae (blue), pupae (orange), adults (purple), and unidentifiable (grey).

Host Species	eggs	larvae	pupae	adults	unidentifiable
<i>M. capitata</i>	0.00	0.75	0.15	0.08	0.02
<i>P. varians</i>	0.02	0.55	0.15	0.25	0.03
<i>P. acuta</i>	0.00	0.65	0.02	0.28	0.05
<i>P. compressa</i>	0.00	1.00	0.00	0.00	0.00
